

At Puddleducks our aim is to provide a friendly, safe and stimulating environment where children can develop their mental, physical, social and creative skills through a wide range of activities.

## Early Years Foundation Stage (EYFS)

The Early Years Foundation Stage (EYFS) was introduced in 2008 and is a framework which supports children from birth to the end of the reception year in Primary School. It is based on the principle that children are born ready, able and eager to learn. Development is not an automatic process it depends on each unique child having opportunities to interact in positive relationships & enabling environments. At Puddleducks our aim is to provide your child with the foundations for them to grow to become confident, capable & self-assured individuals.

## EYFS Themes and Principles

About the Themes and Principles

A Unique Child	Positive Relationships	Enabling Environments	Learning and Development
Every child is a competent learner from birth who can be resilient, capable, confident and self-assured.	Children learn to be strong and independent from a base of loving and secure relationships with parents and/or a key person.	The environment plays a key role in supporting and extending children's development and learning.	Children develop and learn in different ways and at different rates and all areas of Learning and Development are equally important and inter-connected.
Effective practice, research and resources	Effective practice, research and resources	Effective practice, research and resources	Effective practice, research and resources

## Child Development

During your child's time at the nursery they will be periodically monitored for their development. Their Family profile contains evidence to show their progress that supports the EYFS framework. You will be able to view this at any time and will be given a login to access your child's profile from home. You will also be able to provide your own input and upload photographs to Family.
